## EZ Handrail & Fence

---

### EZ Handrail

EZ Handrail pre-engineered railing system combines the durability, strength, and low maintenance of aluminum while meeting nationwide building codes. With residential and commercial heights available, EZ Handrail is ideal for both professional and DIY installations since no special tools or skills are required. Whether installed at your home, business, or commercial project you can rest assured the 10-year finish warranty and low maintenance of EZ handrail will provide years of satisfaction and safety. EZ Handrail kits are available in easily assembled 6 and 8 ft. lengths that install in less than an hour between existing posts or EZ Posts (Part# EZPRW) purchased separately. Every kit includes the necessary hardware and fasteners required to attach EZ Handrail railings to metal, wood, brick or concrete posts and walls. Additionally, all EZ Handrail Kits may also be used for stairs or ramp applications by mitering (cutting) the pickets at the appropriate angle and then using the EZ Pivot Mount Kit (Part# EZPMW, purchased separately) to attach the railing to any post or wall. Heights available are 36" and 42".

### EZ Fence

EZ Fence is the same product as EZ Handrail, just taller. EZ Fence is available in 52" & 60" Heights. EZ Fence is the answer for pool fences, property fences, and anywhere you need a taller barrier. Again this product meets current 2006 International Building Code requirements. And installs in minutes with a durable powder coated finish. Available colors are White, Bronze, Mill, and Custom.
